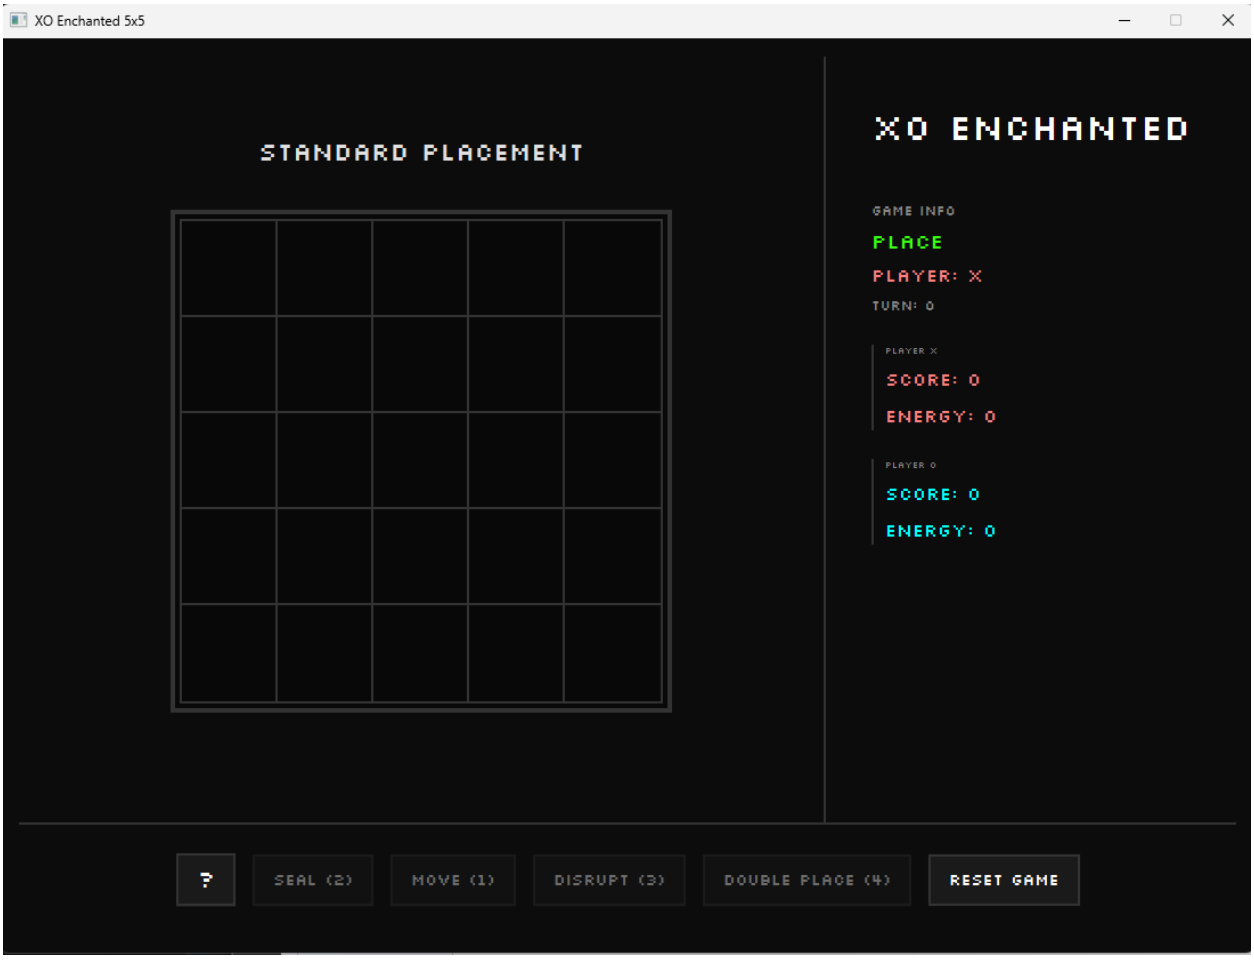
X0 Enchanted 5x5 Program User Manual

Program Description

This game is an extension of the basic 3x3 XO game. The game has been enhanced with a 5x5 grid, special abilities (skills), and various rules, which will be explained in the following sections. The game is divided into two sides: X and O.



Key Terms

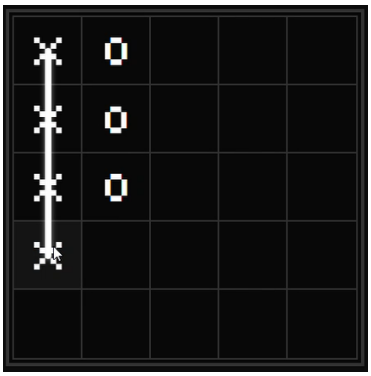
- **Piece:** Refers to the player's symbol placed on the board.
- **Sudden Death:** Refers to a round where, if either player scores in this round, they instantly win.
- **Skill:** Refers to the player's special abilities that can be used to aid in gameplay.

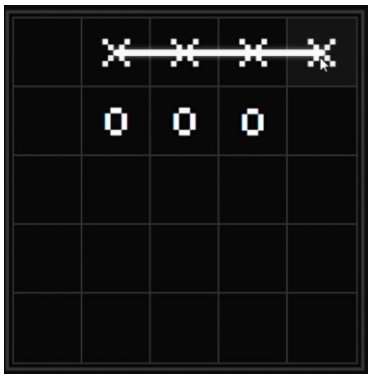
Game Objective

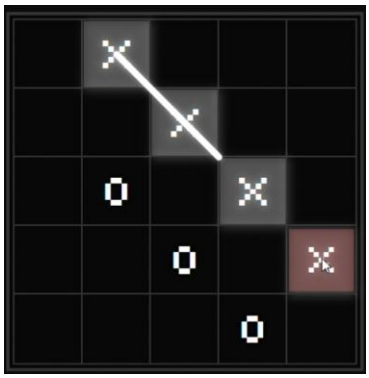
The first player to reach 10 points wins. There is a limit of 32 rounds (including both players' turns). If the round limit is reached and no player has scored 10 points, the winner will be determined by the number of points. The player with more points wins. Finally, if both players have the same score in the 32nd round, the game proceeds to a Sudden Death round.

Basic Rules

1. A player can place only 1 piece per round.
2. Points are scored by aligning 4 markers horizontally, vertically, or diagonally.







3. Upon successful alignment according to rule 2, the player receives 1 point.
4. If a player aligns pieces in more than 1 direction, they can choose to score from any one of those directions by hovering the mouse over the desired row/line.

Frozen Rule

A piece that remains on the board for 3 complete rounds will be Frozen. This status lasts for 1 round and disappears after the time is up. While a piece is in this state, it cannot be moved, and skills cannot be used on it. In the image on the right, pieces with an orange background are in this state.

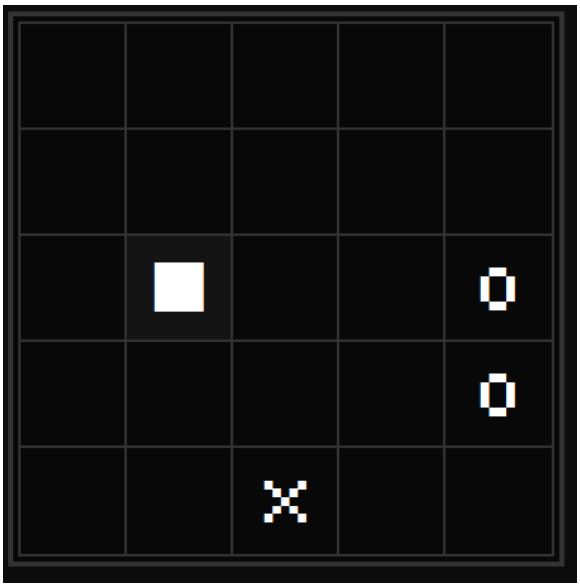
Special Abilities (Skill)

- ### Seal

Used to block 1 space, preventing the opponent from placing a piece in that space. This ability remains active until the opponent places a piece in other spaces. Using this ability costs the player 2 units of energy per use.

Steps to Use

1. Click the "Seal" button located below the game window.
2. Select the space the player wishes to block (can only select highlighted spaces).
3. Click on that space.

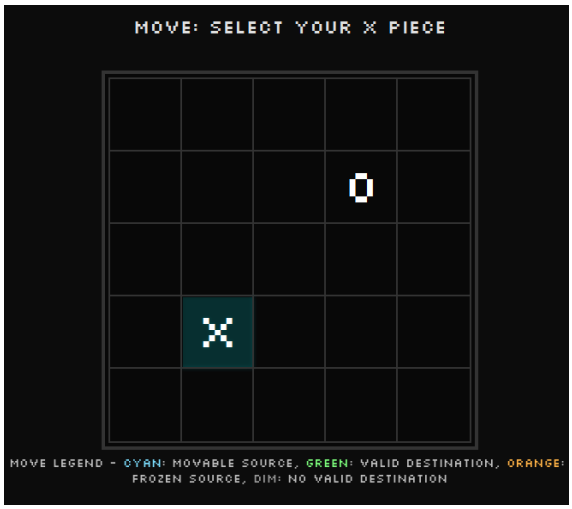


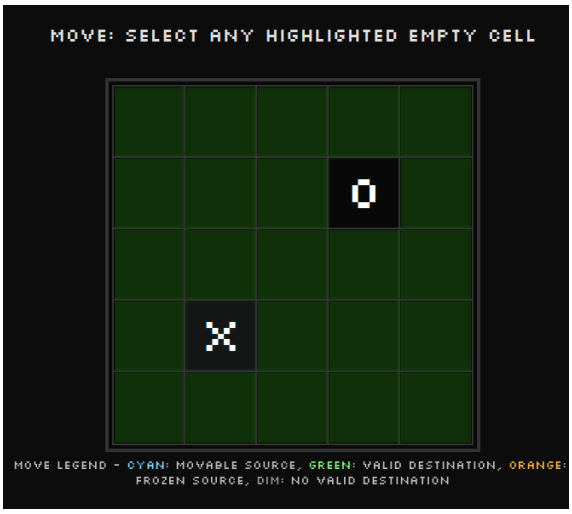
- ### Move

Used to move 1 of the player's own pieces to a desired position. It can only be placed on green empty spaces on the board, and using this ability costs the player 1 unit of energy per use.

Steps to Use

1. Click the "Move" button located below the game window.
2. Select the piece the player wishes to move.
3. Select the desired position (can only place on green spaces).
4. Click on that position.





- **Disrupt**

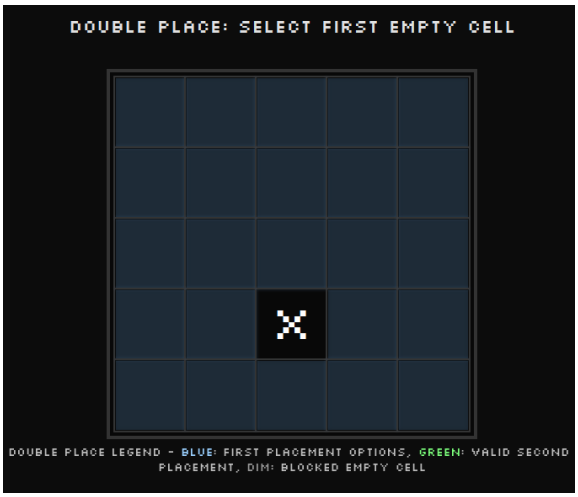
Used to destroy 1 of the opponent's pieces. Using this ability costs the player 3 units of energy per use.

Steps to Use

1. Click the "Move" button located below the game window.
2. Select the opponent's piece the player wishes to destroy. If it appears red, it can be destroyed.
3. Click on that piece to destroy it.

- ## Double Place

Used to place two pieces in one round, but they cannot be placed in adjacent empty spaces as shown in the image. Using this ability costs the player 4 units of energy per use.

Steps to Use


1. Click the "Double Place" button located below the game window.
2. Select the first position the player wishes to place and click on that position.
3. Select the second position the player wishes to place (can only place on green spaces).
4. Click on the second position.
